# About the Author

**Hunyue Yau** is an electrical engineer who graduated from the California Institute of Technology. He has worked with Linux since the early '90s, starting with the Soft Landing System. He created one of the first embedded Linux devices in 1996 with a custom-made distribution. He has worked on various products such as embedded Linux appliances, embedded BSD-based devices, and embedded Linux mobile devices. As an active member of the BeagleBoard community, he has volunteered at numerous community events, from Maker Faire to Google Summer of Code mentoring. Today, Hunyue synergizes his electrical engineering skills with embedded Linux software skills to provide turnkey embedded Linux consulting services through HY Research LLC (<http://www.hy-research.com/>), a company founded by him.

---

I would like to thank my wife, Betty, for supporting me while writing this book as well as the many members of the BeagleBoard community.

---

# About the Reviewers

**Tobias Janke** lives in Northern Germany. He has been experimenting with computers and hardware since he learned to read. He realized several hardware projects and developed small applications at the age of 12. Then, with some more experience, he cofounded a local company that specializes in computer services and web design. As a hobby, he is working on computer-controlled hardware projects featuring embedded programming and sensors. He is currently developing a fully autonomous drone that is controlled by self-made hardware and software running on the BeagleBone Black.

**Samuel de Ancos Martín** got into his passion, software developing, from a very early age. Now he is an engineer and specializes in IoT development. He has been a part of the development team of Carriots, an IoT platform based in Spain, where he played an important part in its design, architecture, and development. He has also taken part in the prototype with free boards and integration hardware with the big manufacturers on the market. As a software developer and enthusiast, he has been working for more than 10 years on building Internet-oriented software. You can get more information about him on his website at <http://deancos.com>.

Samuel blogs occasionally at <http://blog.deancos.com>, in Spanish, about IoT and developing software in general. You can contact him on Twitter at @sdeancos or mail him at [sdeancos@gmail.com](mailto:sdeancos@gmail.com).

---

I would like to thank my girlfriend and my family for supporting me while I was reviewing this magnificent book as well as all my colleagues who helped me grow as a better professional.

---

Do you need instant solutions to your IT questions? PacktLib is Packt's online digital book library. Here, you can search, access, and read Packt's entire library of books.

## Why subscribe?

- Fully searchable across every book published by Packt
- Copy and paste, print, and bookmark content
- On demand and accessible via a web browser

## Free access for Packt account holders

If you have an account with Packt at [www.PacktPub.com](http://www.PacktPub.com), you can use this to access PacktLib today and view 9 entirely free books. Simply use your login credentials for immediate access.

# Table of Contents

<b>Preface</b>	<b>1</b>
<b>Chapter 1: Introducing the Beagle Boards</b>	<b>7</b>
<b>The Beagle board family</b>	<b>8</b>
<b>The Beagle boards</b>	<b>8</b>
BeagleBoard Classic	9
BeagleBoard-xM	10
BeagleBone	12
BeagleBone White	12
BeagleBone Black	13
<b>Summary of the Beagle board family</b>	<b>15</b>
<b>Congratulations on selecting a BeagleBone board</b>	<b>15</b>
<b>Unboxing and powering up your BeagleBone</b>	<b>15</b>
<b>The Windows configuration</b>	<b>19</b>
<b>The Linux configuration</b>	<b>20</b>
<b>Useful PC software for your BeagleBone</b>	<b>20</b>
<b>Accessing the BeagleBone</b>	<b>21</b>
<b>Useful accessories</b>	<b>23</b>
The mains power adapter	23
An SD card reader and microSD cards	23
A serial debug cable	24
A digital multimeter	25
Using the DMM on the BBB	26
Wireless interfacing accessories	27
<b>Summary</b>	<b>28</b>

<b>Chapter 2: Software in the BeagleBone</b>	<b>29</b>
<b>System software in the BeagleBone</b>	<b>30</b>
<b>Distributions on the BeagleBone</b>	<b>30</b>
The Angström Linux distribution	31
The Debian Linux distribution	31
<b>Installing a distribution in the BeagleBone</b>	<b>32</b>
Obtaining the image	32
Windows users	33
Linux users	33
Writing the image	34
Windows users	34
Linux users	35
Booting the image	37
Flasher images	38
<b>Nonsystem software in the BeagleBone</b>	<b>39</b>
<b>Summary</b>	<b>40</b>
<b>Chapter 3: Building an LED Flasher</b>	<b>41</b>
<b>Setting up a foundation for the exercises</b>	<b>41</b>
Selecting an editor	42
Quick start with nano/pico	43
Permissions	43
Determining the current permission	44
Converting permissions to the numeric form	46
Setting up permissions	47
Exercise format and notes	48
<b>Hello, World for the BeagleBone</b>	<b>48</b>
Exercise 1 – creating a Hello, World program	48
<b>Flashing the LEDs</b>	<b>51</b>
LEDs on the BeagleBone	51
Exercise 2 – taking control of the LEDs	52
Figuring out the LED controls	52
Disconnecting the LEDs temporarily from the system	53
Turning on an LED	54
<b>Using the controls in a program</b>	<b>55</b>
Exercise 3 – simple blinking	56
Delays in the program	56
Repeating things with loops	57
Turning off an LED	58
Troubleshooting	60
Exercise 4 – advanced blinking	60
<b>Summary</b>	<b>61</b>

---

<b>Chapter 4: Refining the LED Flasher</b>	<b>63</b>
<b>The I2C bus</b>	<b>63</b>
Accessing I2C	64
The I2C tools	64
Exercise 1	65
<b>The I2C devices on the BeagleBone</b>	<b>68</b>
Exercise 2	69
<b>User interfaces</b>	<b>71</b>
Design	71
Exercise 3	72
Troubleshooting	74
<b>Loading your first web page</b>	<b>74</b>
Troubleshooting the BeagleBone web server access	75
Exercise 4	75
Shell variables	75
Putting it all together	76
Exercise 5	79
Exercise 6	81
Testing	83
Troubleshooting	84
Exercise 7	85
Testing	86
<b>Summary</b>	<b>87</b>
<b>Chapter 5: Connecting the BeagleBone to Mobile Devices</b>	<b>89</b>
<b>Mobile devices</b>	<b>90</b>
<b>Connectivity options</b>	<b>90</b>
<b>Full network connection options</b>	<b>90</b>
<b>Protocol-specific connectivity</b>	<b>91</b>
<b>Mobile device connections</b>	<b>93</b>
Android devices	93
iOS devices	94
<b>Carrier limitations</b>	<b>94</b>
<b>Bluetooth wireless technology</b>	<b>95</b>
Bluetooth versions	95
Bluetooth wireless connectivity	96
<b>Profiles</b>	<b>96</b>
Dial-up Networking	97
Personal Area Network	98
<b>BLE options</b>	<b>100</b>
